

2.5mm, 3.5mm and ¼" (6.35mm) Mono and Stereo Jack Plugs

The **CLIFF**® range of professional quality mono and stereo Jack Plugs are designed for use in many applications including audio, computer, military and industrial uses. Our Jack Plugs are manufactured from solid nickel-plated brass with high temperature Phenolic / PBT insulators and either metal or tough ABS covers. Some models are available with plastic covers in seven standard colours for easy identification. All versions feature a cable clamp, which is an integral part of the ground screen contact, and clamps firmly without damaging the cable.
